Summary

Computer Science and Engineering graduate from The Ohio State University with hands-on experience in SQL, Python, and web development. Used SQL on real organizational data to produce figures that supported funding applications, and built an AI-powered tool that helps developers understand unfamiliar codebases. Eager to build, automate, and support enterprise applications in a collaborative team environment.

Education

The Ohio State University May 2026
Bachelor of Science in Computer Science and Engineering Minor: Mathematics
Relevant Coursework: Database Systems, Data Structures and Algorithms, Networking, AI, Computer Systems

Technical Skills

Languages: Java, Python, C++, C, SQL, JavaScript, HTML/CSS
Tools: Git, Linux, VS Code, Eclipse, REST APIs, MATLAB

Experience

Student Assistant – Healthy Community Center, The Ohio State University November 2025 – May 2026

- Wrote SQL queries to analyze event attendance and participant demographic data, producing figures used in the community center's funding applications
- Analyzed participant data to measure how many attendees were experiencing mental health challenges and how the center's programs supported them, helping demonstrate program impact to funders

Projects

Software Engineer, CodeMap January 2026 – May 2026

- Collaborated with a team of 8 across four 2-week Agile sprints to build a RAG-based developer tool that accelerates onboarding by breaking down unfamiliar codebases
- Engineered and refined LLM prompts to generate clear, structured code explanations, iterating on output format and detail level to improve usefulness for developers
- Built the web interface using HTML and JavaScript allowing users to upload project files or link GitHub repositories and view generated explanations

Full Stack Developer, Split the Bill January 2025 – May 2025

- Developed a web application using Ruby on Rails that tracks group expenses and simplifies cost-sharing across trips and events
- Designed the database schema to store users, groups, and expenses, and implemented user authentication and session management
- Built secure user authentication and session management, **reducing unauthorized access risk** and ensuring compliance with **web security standards**
- Improved overall user experience by developing a clean, **responsive interface** and **intuitive navigation**

Game Developer, Brutus the Plumber January 2024 – May 2024

- **Developed a video game** using **linked lists and pointers in C**, gaining hands-on **experience in memory management** and **data structures**
- **Applied** advanced concepts of **pointers**, **dynamic memory allocation**, and **efficient data handling** to enhance game performance and functionality, **improving runtime by 25%**

Leadership Activities

Part of a sub team Automated and Connecting Vehicles in Auto Drive

- Programmed a CAN communication function used to score the team's autonomous vehicle in competition

Marketing Lead for The Indian Student Association

- Managed internal and external communications and promoted events to increase member engagement
